1. Identification of the material and supplier

**Product name**: Transformer Oil  
**SDS #**: 461633  
**Historic SDS#:** CASLA (105306)  
**Product use**: Transformer Oil  
For specific application advice see appropriate Technical Data Sheet or consult our company representative.  
**Supplier**: BP Australia Pty Ltd (ABN 53 004 085 616)  
Melbourne Central,  
360 Elizabeth Street,  
Melbourne,  
Victoria 3000,  
Australia  
Tel: +61 (03) 9268 4111  
Fax: +61 (03) 9268 3321  
**EMERGENCY TELEPHONE NUMBER**: 1800 14 14 74  
**OTHER PRODUCT INFORMATION**: Technical Help Line 1 300 557 998 (Local Call)  
**Product code**: 461633-AU01

2. Hazards identification

**Statement of hazardous/dangerous nature**: NON-HAZARDOUS SUBSTANCE. NON-DANGEROUS GOODS.

3. Composition/information on ingredients

Highly refined base oil  
This product does not contain any hazardous ingredients at or above regulated thresholds.

4. First-aid measures

**Eye contact**: In case of contact, immediately flush eyes with a copious amount of water for at least 15 minutes. Get medical attention if irritation occurs.  
**Skin contact**: Immediately wash exposed skin with soap and water. Remove contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention if irritation develops.  
**Inhalation**: If inhaled, remove to fresh air. Get medical attention if symptoms appear.  
**Ingestion**: Do NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. If large quantities of this material are swallowed, call a physician immediately.

5. Fire-fighting measures

**Extinguishing Media**  
Suitable: In case of fire, use water fog, foam, dry chemical or carbon dioxide extinguisher or spray.  
**Hazards from combustion products**: These products are carbon oxides  
**Unusual fire/explosion Hazards**: This material is not explosive as defined by established regulatory criteria.  
**Special fire-fighting procedures**: None identified.  
**Protection of fire-fighters**: Fire-fighters should wear self-contained positive pressure breathing apparatus (SCBA) and full turnout gear.
6. Emergency Procedures

Immediately contact emergency personnel. Keep unnecessary personnel away. Use suitable protective equipment (See Section: "Exposure controls/personal protection"). Follow all fire fighting procedures (See Section: "Fire-fighting measures").

If emergency personnel are unavailable, contain spilled material. For small spills add absorbent (soil may be used in the absence of other suitable materials) scoop up material and place in a sealed, liquid-proof container for disposal. For large spills dike spilled material or otherwise contain material to ensure runoff does not reach a waterway. Place spilled material in an appropriate container for disposal. Avoid contact of spill material with soil and prevent runoff entering surface waterways. See Section 13 for Waste Disposal Information.

7. Handling and storage

Handling
Avoid prolonged or repeated contact with skin. Wash thoroughly after handling.

Storage
Keep container tightly closed. Keep container in a cool, well-ventilated area.

Combustibility Classification
Combustible liquid Class C1 (AS 1940).

8. Exposure controls/personal protection

Ingredient name
Distillates (petroleum), hydrotreated, light naphthenic (Highly refined mineral oil)

Occupational exposure limits
NOHSC (Australia).
TWA: 5 mg/m³ 8 hour(s). Form: Oil mist, mineral

Whilst specific OELs for certain components are included in this SDS, it should be noted that other components of the preparation will be present in any mist, vapour or dust produced. For this reason, the specific OELs may not be applicable to the product and are provided for guidance purposes.

Biological Limit Values
No biological limit allocated.

Control Measures
Provide exhaust ventilation or other engineering controls to keep the relevant airborne concentrations below their respective occupational exposure limits.

Hygiene measures
Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period.

Personal protective equipment

Respiratory system
Avoid breathing of vapours, mists or spray. Select and use respirators in accordance with AS/NZS 1715/1716. When mists or vapours exceed the exposure standards then the use of the following is recommended: Approved respirator with organic vapour and dust/mist (Type P1) filters. Filter capacity and respirator type depends on exposure level.

Skin and body
Avoid prolonged or repeated contact with skin. Wear protective clothing if prolonged or repeated contact is likely.

Hands
Wear protective gloves if prolonged or repeated contact is likely. Chemical resistant gloves. Recommended: Nitrile gloves. The correct choice of protective gloves depends upon the chemicals being handled, the conditions of work and use, and the condition of the gloves (even the best chemically resistant glove will break down after repeated chemical exposures). Most gloves provide only a short time of protection before they must be discarded and replaced. Because specific work environments and material handling practices vary, safety procedures should be developed for each intended application. Gloves should therefore be chosen in consultation with the supplier/manufacturer and with a full assessment of the working conditions.

Eyes
Safety glasses with side shields.

9. Physical and chemical properties

Physical state
Liquid.

Colour
Yellow. Pale colour.

Odour
Odourless.

Auto-ignition temperature
>270 °C

Flash point
145 °C (Open cup) Cleveland.
148 °C (Closed cup) Pensky-Martens.

Pour Point
-57 °C

Boiling point
Not available.

Melting point
Not available.

Density
889 kg/m³ (0.889 g/cm³) at 15°C

Vapour density
Not available.

Vapour pressure
Not available.

Solubility
Insoluble in water.
10. Stability and reactivity

Stability
The product is stable.

Conditions to Avoid
Avoid extreme temperatures, strong oxidizers, fire.

Incompatibility with various substances/Hazardous Reactions
Reactive or incompatible with the following materials: oxidizing materials.

Hazardous polymerization
Will not occur.

Hazardous Decomposition Products
These products are carbon oxides.

11. Toxicological information

Effects and symptoms

Eyes
Unlikely to cause more than transient stinging or redness if accidental eye contact occurs.

Skin
Prolonged or repeated contact can defat the skin and lead to irritation and/or dermatitis.

Inhalation
Inhalation of oil mist or vapours at elevated temperatures may cause respiratory irritation.

Ingestion
Unlikely to cause harm if accidentally swallowed in small doses, though larger quantities may cause nausea and diarrhoea.

Chronic toxicity
No component of this product at levels greater than or equal to 0.1% is identified as a carcinogen by ACGIH, the International Agency for Research on Cancer (IARC), the European Commission (EC), or the National Occupational Health and Safety Commission (Australia).

Carcinogenic effects
No component of this product at levels greater than or equal to 0.1% is identified as a carcinogen by ACGIH, the International Agency for Research on Cancer (IARC), the European Commission (EC), or the National Occupational Health and Safety Commission (Australia).

12. Ecological information

Ecotoxicity
Not classified as environmentally hazardous in accordance with the 'Approved Criteria for Classifying Hazardous Substances' [NOHSC (1008)/2004 as amended and adapted].

Biodegradability
Persistence/degradability
The biodegradability of this material has not been determined.

13. Disposal considerations

Disposal Consideration / Waste information
Avoid contact of spilled material and runoff with soil and surface waterways. Consult an environmental professional to determine if local, regional or national regulations would classify spilled or contaminated materials as hazardous waste. Use only approved transporters, recyclers, treatment, storage or disposal facilities. Dispose of in accordance with all applicable local and national regulations.

Special Precautions for Landfill or Incineration
No additional special precautions identified.

14. Transport information

Not classified as dangerous for transport (ADG, IMDG, ICAO/IATA).

Special precautions for user
No known special precautions required. See Section: "Handling and storage" for additional information.

15. Regulatory information

Standard for the Uniform Scheduling of Drugs and Poisons
Not regulated.

Control of Scheduled Carcinogenic Substances

Ingredient name
Schedule
No Listed Substance

Other Classification Information

Other regulations

Inventories
Europe inventory: All components are listed or exempted.
United States inventory (TSCA 8b): All components are listed or exempted.
Australia inventory (AICS): All components are listed or exempted.
Canada inventory: All components are listed or exempted.
China inventory (IECSC): All components are listed or exempted.

Transformer Oil
Product code 461633-AU01
Format Australia
Language ENGLISH
Build 3.4.0
Page: 3/4
16. Other information

Key to abbreviations

AMP = Acceptable Maximum Peak
ACGIH = American Conference of Governmental Industrial Hygienists, an agency that promulgates exposure standards.
ADG = Australian Code for the Transport of Dangerous Goods by Road and Rail
ADG Code = Australian Code for the Transport of Dangerous Goods by Road and Rail
CAS Number = Chemical Abstracts Service Registry Number
HAZCHEM Code = Emergency action code of numbers and letters which gives information to emergency services. Its use is required by the ADG Code for Dangerous Goods in bulk.
ICAO = International Civil Aviation Organization.
IATA = International Air Transport Association, the organization promulgating rules governing shipment of goods by air.
IMDG = International Maritime Organization Rules, rules governing shipment of goods by water.
IP 346 = A chemical screening assay for dermal toxicity. The European Commission has recommended that Method IP 346 be used as the basis for labelling certain lubricant oil base stocks for carcinogenicity. The EU Commission has stipulated that the classification as a carcinogen need not apply if it can be shown that the substance contains less than 3% DMSO extract as measured by IP 346. (See Note L, European Commission Directive 67/548/EEC as amended and adapted.) DMSO is a solvent.
NOHSC = National Occupational Health & Safety Commission, Australia
TWA = Time weighted average
STEL = Short term exposure limit
UN Number = United Nations Number, a four digit number assigned by the United Nations Committee of Experts on the Transport of Dangerous Goods.

History

Date of issue 20/07/2007.
Date of previous issue No Previous Validation.

Notice to reader

All reasonably practicable steps have been taken to ensure this data sheet and the health, safety and environmental information contained in it is accurate as of the date specified below. No warranty or representation, express or implied is made as to the accuracy or completeness of the data and information in this data sheet.

The data and advice given apply when the product is sold for the stated application or applications. You should not use the product other than for the stated application or applications without seeking advice from us.

It is the user’s obligation to evaluate and use this product safely and to comply with all applicable laws and regulations. The BP Group shall not be responsible for any damage or injury resulting from use, other than the stated product use of the material, from any failure to adhere to recommendations, or from any hazards inherent in the nature of the material. Purchasers of the product for supply to a third party for use at work, have a duty to take all necessary steps to ensure that any person handling or using the product is provided with the information in this sheet. Employers have a duty to tell employees and others who may be affected of any hazards described in this sheet and of any precautions that should be taken.
