- Project implementation - management, procurement, design
- Transmission & distribution network engineering - planning, modelling, procurement, design
- Major industrial applications - cogeneration, electrical distribution, efficiency
- Operations & maintenance, audits, rebuilds, asset management services
- Owner & Independent Engineer role

Safety

Nothing is more important than safety. That's why at GHD, in addition to our outstanding track record and awards for our safety systems, we continuously pursue innovative, considered ways to make our people, clients and communities safer.

Client focus

Our mission is to be recognised by our clients as safety conscious, trustworthy, reliable, technically competent, easy to work with and delivering measurable value. We work hard at listening and understanding our clients' business and what they want to achieve. Our performance in the eyes of our clients and their expectations are evaluated on every project to enable us to measure the level of client satisfaction and to assist us with continuous improvement.

Global, yet local

With more than 6,500 professionals in 100 offices across five continents, we're likely to be local to your operations. Pair this with our ability to access our people and knowledge from anywhere globally using standardised and proven systems and our clients truly enjoy access to One GHD network.

Sustainability

Sustainable practice is not new to us - we've been delivering energy efficient, sustainable solutions to our clients for more than 30 years. We integrate sustainability assessment criteria into each stage of the project pipeline to demonstrate a consistent understanding of the relevant environmental impacts, biodiversity and cultural issues associated with your project.

Track record

Whether you are a developer looking to establish a new facility, an existing asset owner, a network company or major industrial customer, we can offer an extensive breadth of knowledge, depth of experience and the right mix of people to put you on the path to project success. As a professional services company, our reputation is paramount - we are proud of our track record.

Depth of services

At GHD, we deliver more than infrastructure. Our clients enjoy access to solutions across the entire project lifecycle for generation, transmission, distribution and major end-use applications. Engage us and access a truly integrated offering including:

- Planning, policy & regulatory advice
- Site identification & selection
- Stakeholder consultation & landowner arrangements
- Environmental assessments, approvals & management
- Planning & negotiation of connection arrangements
- Safety, risk management & due diligence
- Owners & Independent Engineers role
- Water supply & treatment
- Non-process infrastructure
- Fuel handling & transport
- Waste treatment & disposal
- Civil & structural engineering
- Transportation
