

Value Management Workshop

The NSW Roads and Traffic Authority (RTA) is identifying an upgrade of the Pacific Highway between the Oxley Highway and Kempsey.

A value management workshop was held in December 2005 with representatives from government departments, Port Macquarie-Hastings and Kempsey Shire councils and community interests.

The outcome of the workshop is not a final decision. No preferred option has been selected at this stage.

The consensus of the workshop participants was that the orange option in sections A, B and D, and the blue option in section C, together with the common routes in sections A and D was preferred over other options, subject to further environmental and cultural investigations.

Details for the route options can be found in the October community update. A copy can be viewed on the project website or by phoning the project information line (see details below).
