

GHD Air & Noise

WATER | ENERGY & RESOURCES | ENVIRONMENT | PROPERTY & BUILDINGS | TRANSPORTATION

Our team of industry professionals work collaboratively across the globe and harness the most up to date technology in the air and noise management sphere.

GHD provides practical, scientific based air quality and noise management solutions. We consider sustainable practice and legislative demands on air and noise outcomes to help you reach your targets efficiently – to keep you ahead of the pack.

The right advice in air & noise can help the environment, improve your project success and reduce life cycle costs.

Services:

- Emissions inventories
- Emissions monitoring
- Atmospheric dispersion modelling
- Ambient air quality monitoring
- Environmental Impact Assessment (Air and Noise)
- Air quality policy
- Emissions reduction
- Industrial and mining noise assessment
- Noise mitigation strategies
- Building acoustic services
- Road and rail acoustic assessment
- Environmental noise monitoring and modelling
- Integrated acoustics noise attenuation
