

# **GHD** Building Hydraulics

WATER | ENERGY & RESOURCES | ENVIRONMENT | PROPERTY & BUILDINGS | TRANSPORTATION

**As an integral part of our full building services delivery, GHD's hydraulics and fire services embody client responsive listening, advanced technology and ecologically sustainable design.**

Our clients are active in all community and business sectors — from justice, healthcare and education through to residential, commercial, retail property and everything in between.

Our services, whilst specific and focused, have relevant applications including sanitary plumbing and drainage, pumped sewerage reticulation, vacuum plumbing and drainage installations. We'll also help you with trade waste plumbing, drainage and pre-treatment of grease, chemicals, acids, silts and oils.
