

# GHD Land Development

WATER | ENERGY & RESOURCES | ENVIRONMENT | PROPERTY & BUILDINGS | TRANSPORTATION

**Property and development projects across the globe aim to address government and community concerns for better social, economic and environmental outcomes.**

The growth and regeneration of our cities and regions requires sophisticated management, planning, design, engineering and scientific approaches. Value creation and practical solutions that include an appreciation of integration, commerciality and sustainability are the ultimate goal.

Whether your project is a small, local undertaking or a mega-project, GHD can provide a full suite of services — from assistance with urban policy and governance to the successful delivery and operation of built outcomes.

## **Services**

- Urban policy and governance
- Planning services
- Architecture
- Landscape architecture and interior design
- Electrical, mechanical and civil engineering
- Water and wastewater planning and treatment
- Environmental consulting
- Transport and traffic planning and design
- Project management
