

GHD Project Management

WATER | ENERGY & RESOURCES | ENVIRONMENT | PROPERTY & BUILDINGS | TRANSPORTATION

While a project's technical details may vary, the client's needs remain the same: completion on time and within budget, and performance to specification after commissioning.

GHD procedures and systems facilitate the coordination and control of all phases of project development – for small and large developments.

Our services span feasibility studies, concept planning and financial evaluation and design management. Our EPCM services include contracts administration, procurement, industrial relations, construction management and control of cost budgets, time schedules and quality assurance.

Services

- Achieve defined project requirements
- Realise the right balance between capital cost and operating maintenance costs
- Eliminate conflicts between quality and cost
- Adapt the scope of services to complement your resources
- Engage the right skills for the project
- Gain the confidence and experience to employ fast-track methods
