

GHD Rail

WATER | ENERGY & RESOURCES | ENVIRONMENT | PROPERTY & BUILDINGS | TRANSPORTATION

GHD's team of rail professionals will work seamlessly with you through comprehensive services within all sectors of the rail industry.

Drawing on decades of local, state, national and global knowledge, we're well equipped to improve the efficiency and effectiveness of your rail business.

We partner with rail operators, infrastructure owners, maintainers and financiers, suppliers and contractors, government, planners and regulators in management, and operation and maintenance of railway systems.

We're on board with metropolitan, suburban, intercity, high speed, and light rail & tram passenger rail clients. Our freight rail contacts include heavy haul, interstate, bulk, light general, shuttle and intermodal stakeholders.

Through various contracting mechanisms, we offer the most viable processes for railway owners and project financiers.

Enhance your rail performance through improved procurement, management and maintenance of long-life assets: the basis of rail infrastructure.
