

# **GHD** Food Processing

WATER | ENERGY & RESOURCES | ENVIRONMENT | PROPERTY & BUILDINGS | TRANSPORTATION

**Excellence in manufacturing and process design, unrivalled hygiene standards and a focus on ecologically and economically sustainable operation are essential elements of success in the food industry.**

Community expectations and government regulation demand that the highest standards are set and maintained in the handling and production of food. Stakeholders in this industry are constantly under scrutiny and face complex challenges to meet these expectations.

GHD offers considered solutions for the baking, dairy, beverage, confectionary & snack foods, seafood, fruit & vegetable, meat, seafood, cold chain, FMCG, pharmaceutical, biotechnical markets and beyond.

**Key areas that we focus on include:**

- Industrial water and waste management
- Irrigation and the environment
- Transportation infrastructure
- Planning
- Food processing and manufacturing
- Building Design
