

GHD Risk Management

WATER | ENERGY & RESOURCES | ENVIRONMENT | PROPERTY & BUILDINGS | TRANSPORTATION

As international focus on risk continues to escalate, we hold a leading position as a provider of risk management services. GHD combines technical, operational and business know-how with risk management competency and experience.

Underpinning our success is a unique market offering – the powerful combination of technical, operational and business know-how coupled with risk management skill and experience.

Enterprise-wide risk management - we support clients in a variety of areas to enhance their business from the boardroom to operations and projects.

Risk assessment processes - an excellent means of systematically ranking hazards, prioritising issues and identifying controls that prevent their manifestation.

Managing safety - we recognise that safety and business performance is influenced not only by assets, materials and operations, but also by people, culture, systems and reputation, and we help clients to understand and better manage all of these.
